retinal rod cell differentiation
muscle atrophy
regulation of receptor clustering
response to interferon−beta
excretion
regulation of sterol transport
regulation of cholesterol transport
positive regulation of morphogenesis of an epithelium
cardiac myofibril assembly
tolerance induction
antigen processing and presentation of endogenous antigen
modulation by symbiont of entry into host
chondroitin sulfate proteoglycan metabolic process
aminoglycan catabolic process
response to zinc ion
detoxification
positive regulation of smooth muscle cell proliferation
acute inflammatory response
positive regulation of tyrosine phosphorylation of STAT p...
positive regulation of response to cytokine stimulus
regulation of pri−miRNA transcription by RNA polymerase II
cardiac septum morphogenesis
regulation of tissue remodeling
negative regulation of Wnt signaling pathway
negative regulation of cell cycle G1/S phase transition
cranial skeletal system development
positive regulation of cell killing
complement activation
negative regulation of response to biotic stimulus
negative regulation of innate immune response
negative regulation of defense response
cell killing
sulfur compound biosynthetic process
icosanoid metabolic process
regulation of epithelial cell differentiation
branching morphogenesis of an epithelial tube
response to BMP
tissue homeostasis
female pregnancy
regulation of ossification
biomineralization
regulation of biomineralization
tissue remodeling
negative regulation of cellular response to growth factor...
positive regulation of apoptotic signaling pathway
maintenance of cell number
response to interferon−gamma
positive regulation of T cell proliferation
molting cycle process
hair cycle process
skin epidermis development
somite development
regulation of epithelial cell apoptotic process
positive chemotaxis
regulation of superoxide metabolic process
positive regulation of cell division
response to progesterone
modulation of process of other organism
intrinsic apoptotic signaling pathway in response to DNA ...
ensheathment of neurons
axon ensheathment
alcohol biosynthetic process
regulation of peptidase activity
negative regulation of growth
inner mitochondrial membrane organization
ATP synthesis coupled proton transport
NADH metabolic process
monosaccharide catabolic process
negative regulation of transporter activity
regulation of cellular amino acid metabolic process
antigen processing and presentation of exogenous peptide ...
regulation of G2/M transition of mitotic cell cycle
central nervous system neuron axonogenesis
behavioral response to cocaine
regulation of cardiac muscle contraction by calcium ion s...
fear response
neuron migration
cellular response to monosaccharide stimulus
cellular response to hexose stimulus
regulation of catecholamine secretion
glutamate secretion
protein localization to synapse
chemical synaptic transmission, postsynaptic
multicellular organismal signaling
cardiac conduction
striated muscle contraction
response to monoamine
response to catecholamine
detection of calcium ion
monosaccharide biosynthetic process
clathrin−dependent endocytosis
regulation of mitochondrion organization
negative regulation of establishment of protein localization
regulation of microtubule−based process
microtubule polymerization or depolymerization
cellular protein complex disassembly
membrane fusion
membrane docking
exocytic process
protein dephosphorylation
dephosphorylation
viral transcription
nuclear−transcribed mRNA catabolic process
translational initiation
SRP−dependent cotranslational protein targeting to membrane
neutrophil mediated immunity
granulocyte activation
rRNA processing
ribosome biogenesis
ribonucleoprotein complex subunit organization
regulation of leukocyte proliferation
leukocyte cell−cell adhesion
mononuclear cell differentiation
regulation of immune effector process
adaptive immune response
positive regulation of response to external stimulus
cell chemotaxis
positive regulation of cytokine production
extracellular structure organization
positive regulation of cell migration
positive regulation of cell adhesion
angiogenesis
tissue migration
cell−substrate adhesion
coagulation
blood coagulation
wound healing
actin filament organization
cellular response to environmental stimulus
cellular response to abiotic stimulus
fatty acid metabolic process
regulation of cell shape
homeostasis of number of cells
response to decreased oxygen levels
response to bacterium
cellular response to biotic stimulus
cellular response to lipid
osteoblast differentiation
ossification
epithelial cell development
skeletal system development
connective tissue development
learning or memory
behavior
regulation of trans−synaptic signaling
modulation of chemical synaptic transmission
regulation of protein transport
regulation of transporter activity
potassium ion transport
regulation of membrane potential
synapse organization
synapse assembly
hormone transport
establishment of protein localization to extracellular re...
regulation of ion transmembrane transport
signal release from synapse
neurotransmitter secretion
neurotransmitter transport
vesicle−mediated transport in synapse
vesicle organization
vesicle localization
divalent inorganic cation homeostasis
oxidative phosphorylation
ATP metabolic process
macroautophagy
protein polyubiquitination
nucleoside phosphate metabolic process
chordate embryonic development
