peripheral nervous system axon ensheathment
myelination in peripheral nervous system
negative regulation of vascular permeability
positive regulation of receptor internalization
regulation of keratinocyte proliferation
positive regulation of morphogenesis of an epithelium
cellular response to drug
positive regulation of neural precursor cell proliferation
negative regulation of nucleotide metabolic process
negative regulation of ATP metabolic process
vasodilation
developmental induction
collagen fibril organization
macrophage cytokine production
face development
cell aging
T−helper 17 type immune response
T−helper 17 cell differentiation
germinal center formation
PERK−mediated unfolded protein response
'de novo' protein folding
centrosome localization
neurotransmitter−gated ion channel clustering
carnitine shuttle
B cell apoptotic process
cellular response to amino acid starvation
regulation of lipoprotein lipase activity
glycoside metabolic process
poly(A)+ mRNA export from nucleus
positive regulation of viral release from host cell
midbody abscission
viral budding via host ESCRT complex
respiratory burst
negative regulation of leukocyte mediated cytotoxicity
mitotic metaphase plate congression
membrane protein proteolysis
GPI anchor biosynthetic process
antimicrobial humoral response
regulation of plasma lipoprotein particle levels
regulation of phospholipid metabolic process
low−density lipoprotein receptor particle metabolic process
pigment biosynthetic process
positive regulation of granulocyte chemotaxis
taxis
developmental growth
hydrogen peroxide−mediated programmed cell death
hydrogen peroxide catabolic process
cellular detoxification
vitamin metabolic process
cellular modified amino acid biosynthetic process
organelle disassembly
response to unfolded protein
regulation of cellular response to heat
regulation of microtubule cytoskeleton organization
positive regulation of neuron death
circadian regulation of gene expression
DNA packaging
chromatin organization involved in negative regulation of...
regulation of cell division
macromolecule deacylation
demethylation
regulation of chromatin organization
somitogenesis
somite development
molting cycle
hair cycle
striated muscle cell proliferation
establishment of cell polarity
response to mechanical stimulus
regulation of T cell activation
cell−matrix adhesion
actomyosin structure organization
regulation of fibroblast proliferation
phagocytosis, recognition
cellular response to alcohol
regulation of cell size
regulation of biomineralization
biomineralization
regulation of ossification
tissue remodeling
regulation of immune effector process
cellular response to environmental stimulus
positive regulation of behavior
cranial nerve morphogenesis
N−acetylglucosamine metabolic process
layer formation in cerebral cortex
intermediate filament−based process
intermediate filament cytoskeleton organization
cell communication by electrical coupling
cilium−dependent cell motility
cilium or flagellum−dependent cell motility
neurotransmitter receptor transport
behavioral defense response
detection of external stimulus
detection of abiotic stimulus
cell recognition
protein localization to synapse
lipid export from cell
glutamate secretion
neuron migration
signal release from synapse
neurotransmitter secretion
neurotransmitter transport
synaptic vesicle cycle
hormone transport
transmission of nerve impulse
actin−mediated cell contraction
chemical synaptic transmission, postsynaptic
regulation of transporter activity
multicellular organismal signaling
cell−cell adhesion via plasma−membrane adhesion molecules
neutrophil mediated immunity
neutrophil activation
granulocyte activation
ribosome biogenesis
nucleoside triphosphate biosynthetic process
inner mitochondrial membrane organization
mitochondrial respiratory chain complex assembly
peroxisome organization
carbohydrate derivative catabolic process
small molecule catabolic process
SRP−dependent cotranslational protein targeting to membrane
cotranslational protein targeting to membrane
establishment of protein localization to endoplasmic reti...
nuclear−transcribed mRNA catabolic process, nonsense−medi...
viral gene expression
tumor necrosis factor production
response to oxidative stress
process utilizing autophagic mechanism
autophagy
maintenance of cell number
anterior/posterior pattern specification
ossification
sex differentiation
homeostasis of number of cells
multicellular organismal homeostasis
adaptive thermogenesis
negative regulation of transferase activity
negative regulation of phosphorus metabolic process
negative regulation of cellular amide metabolic process
gene silencing
cellular response to external stimulus
positive regulation of cellular catabolic process
regulation of cell growth
cell growth
negative regulation of growth
regulation of cell morphogenesis
wound healing
epithelial cell differentiation
cellular response to organic cyclic compound
positive regulation of locomotion
positive regulation of cell motility
muscle tissue development
muscle structure development
negative regulation of cell differentiation
embryonic morphogenesis
regulation of small GTPase mediated signal transduction
positive regulation of GTPase activity
covalent chromatin modification
gamete generation
methylation
synapse organization
modulation of chemical synaptic transmission
synapse assembly
dendrite development
learning or memory
behavior
regulation of system process
regulation of membrane potential
regulation of ion transmembrane transport
Wnt signaling pathway, planar cell polarity pathway
interleukin−1−mediated signaling pathway
negative regulation of cell cycle G2/M phase transition
regulation of hematopoietic stem cell differentiation
anaphase−promoting complex−dependent catabolic process
regulation of cellular amine metabolic process
antigen processing and presentation of exogenous antigen
positive regulation of response to biotic stimulus
cellular response to oxygen levels
oxidative phosphorylation
ATP metabolic process
cellular amino acid metabolic process
mitochondrial translation
mitochondrial gene expression
cellular protein complex disassembly
ribonucleoprotein complex subunit organization
DNA−dependent DNA replication
steroid biosynthetic process
positive regulation of response to external stimulus
positive regulation of defense response
membrane fusion
